General Details

Introduction

A Census of Population was taken on the night of Sunday, 28 April 2002¹, in accordance with the Statistics (Census of Population) Order 2001 (S.I. No. 491 of 2001)². A copy of the census questionnaire, including the explanatory notes which accompanied it, is reproduced in Appendix 1.

This fourth volume of the detailed census report is in three parts. Part I contains detailed classifications of the population by usual residence at census date and one year prior to census date. Part II contains tabulations according to birthplace, while Part III covers nationality.

With the exception of Tables 1, 2 and 35, the tables in this volume relate to the usually resident population in each area, as analyses involving migration are more meaningful when presented in this way.

Subsequent census volumes will analyse the population by such characteristics as occupation, industry, education, disability, religion, etc.

Coverage of the Census

The census figures relate to the *de facto* population, i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 28 April 2002, together with all persons who arrived in that area on the morning of Monday, 29 April 2002, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on census night as well as those in residence, while usual residents temporarily absent from the area are excluded from the census count.

A limited number of questions, relating mainly to demographic characteristics, were asked in respect of usual residents who were temporarily absent from their households on census night. The responses to these questions enables a more precise picture to be built up on families and households by excluding visitors present on census night and including residents who were temporarily absent.

Conduct of the Census

A temporary field force consisting of 5 Census Liaison Officers, 35 Regional Supervisors, 350 Field Supervisors and some 4,000 part-time enumerators carried out the census enumeration. Blank census questionnaires were distributed to every household and communal establishment in the State during the four weeks immediately preceding census night. Collection of completed questionnaires commenced on Monday, 29 April. The enumerators examined the questionnaires at the time of collection to ensure that they were correctly completed and, where necessary, they assisted householders in their completion.

Production of Results

Each enumerator first prepared and returned to the Central Statistics Office (CSO) a summary of the population in his/her enumeration area. These summaries formed the basis for the preliminary 2002 population results³. The completed questionnaires for the individual households were subsequently transmitted to the CSO for processing.

The population summaries, dwelling listings and enumeration maps for individual enumeration areas were checked for consistency and used to determine the boundaries of census towns and suburbs/environs of towns with legal boundaries. The capture and processing of the responses to questions on the census questionnaire proceeded concurrently.

¹ The census originally planned for 29 April 2001 was postponed because of the Foot and Mouth disease situation pertaining at the time.

² The Statistics (Census of Population) Order, 2001 was made by the Minister of State at the Department of the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act, 1993 (No. 21 of 1993) and the Statistics (Delegation of Ministerial Functions) Order, 1997 (S.I. No. 327 of 1997).

³ Census of Population of Ireland, 2002:
Preliminary Report (Pn. 11897), July 2002.

Publication of Results

The planned publication schedule is set out in Appendix 3. The schedule consists of the Principal Demographic Results and Principal Socio-economic Results, which provide the main census results, primarily at national level. More detailed data is provided in 13 subject matter reports. All of the tables published in these reports will be made available on the Central Statistics Office web site (www.cso.ie) using Beyond 20/20 interactive software. This software gives Internet users the ability to select and view data online and then download the same data to their computers.

Definitions

Usual Residence and Migration

The figures for usual residents in a particular area include persons enumerated in that area who stated that their usual residence was at the place where they were enumerated, together with other persons usually resident in that area who were enumerated elsewhere in the State. Usual residents of an area who were not in the State on census night are not included in the figures. The coding of usual residence was on the basis of county only.

Birthplace and Nationality

In the case of persons born in Ireland no attempt was made to distinguish those born in the Cities from those born in the adjoining Counties. Such a distinction would, in any case, have been meaningless in view of the various extensions of City boundaries which, in many cases, may have meant that a person's birthplace was outside a City boundary when s/he was born, but inside it at the date of the census.

It should be noted that the figures for foreign-born persons shown in the section on birthplace (Part II) (with the exception of Table 35) exclude visitors to the country. Table 35 analyses those enumerated in the State by country of birth for 1986, 1991, 1996 and 2002.

Similarly, the figures for non-Irish persons shown in the section on nationality (Part III) exclude visitors to the country.

Aggregate Town and Aggregate Rural Areas

The population in the Aggregate Town Area is defined as those persons living in population clusters of 1,500 or more inhabitants. For this purpose a town with a legally defined boundary is classified on the basis of its total population including any suburbs or environs.

The population residing in all areas outside clusters of 1,500 or more inhabitants is classified as belonging to the Aggregate Rural Area. The Aggregate Rural Area is a statistical concept and is not related to the former Rural District administrative unit.
